

PHOENIX

Phase Converters

GP75NL

**Single Phase 230 Volts to Three
Phase 230 Volts**

DATASHEET

Power Supply		Three Phase Electrical Specs		Loads Examples	
INPUT VOLTAGE	220-440V	VOLTAGE OUTPUT	220-440V	CNC Machine Spindle HP	35 HP
UTILITY SERVICE MIN.	75 KVA / 300 AMPS	MAX INDUCTIVE AMPS	130	Compressor Motor HP	30 HP
MOTOR LOAD TYPE BREAKER	125 to 350 AMP	MAX RESISTIVE AMPS	105/52.5	Total Combined HP of motors	75 HP
SINGLE PHASE WIRE SIZE	3/0 COPPER to 50 feet	IDLER MOTOR WIRE SIZE	1/0	Manual Lathe	35 HP
Dimensions and Weight Electrical Panel		Dimensions and Weight Idler / Generator Motor		IDLER MOTOR	PANEL ENCLOSURE
	Dimensions 24x24x8	Weight 790 LBS	Dimensions 32.5x20x19	TEFC Cast Iron	Nema 4 Indoor / Outdoor

Standard Features

- Auto-restart from blackouts or power loss
- Voltage Monitor Display
- TEFC (Totally Enclosed Fan Cooled) Generator
- Heavy-duty cast iron generator frame
- NEMA 4 enclosure, heavy hinged door, with Lock-Out locks and keys.
- Powder coated for rust protection.
- Precision Balanced Voltage

Optional Features

- 208 or 460 Volts Output (includes transformer)
- PL Model Start and Stop Button with Built-in Mag starter
- AutoStart and Stop with Load Detection
- Digital GPX (wifi, cloud controls, timer, energy monitor)
- Wireless Remote ON/OFF
- AutoLink built in Load Starter and Protection or add another converter
- EX Model, Include pre-install expansion to increase the size of your phase converter

Control Panel

At Phoenix Phase Converters we use the best components that last a lifetime. The 75 HP rotary phase converter is sealed from any outside environment and is made to be used in a metal shop, woodshop, and outdoors. In addition, the phase converter is designed to be utilized in cold or hot weather. An intuitive standard voltage meter display to monitor your generated phase. The rotary phase converter is engineered with a NEMA 4 enclosure to ensure it is durable in a variety of commercial environments.

Generator/Idler

At Phoenix Phase Converters we use the best components that last a lifetime. The 75 HP rotary phase converter is sealed from any outside environment and is made to be used in a metal shop, woodshop, and outdoors. In addition, the phase converter is designed to be utilized in cold or hot weather. An intuitive standard voltage meter display to monitor your generated phase. The rotary phase converter is engineered with a NEMA 4 enclosure to ensure it is durable in a variety of commercial environments.

Wiring Diagram

NL AND NH MODELS

MUST BE INSTALLED BY A INDUSTRIAL LICENSED ELECTRICIAN

Motor Load Breaker should be size
Twice the full load amps of your
equipment

230V Connection for NL and PL Models (low voltage)
460V Connection for NH and PH Models (high voltage)

WARRANTY

Phase Converter Control Panel Warranty

All Phoenix Phase Converters Rotary Phase Converter Control Panels are backed by a lifetime warranty, protecting against defects in materials and craftsmanship. Please note that DIY panels are excluded from this warranty; refer to the DIY panel manual for further details. If any component is found to be defective within the warranty period, Phoenix Phase Converters will either repair or replace it (at our discretion) at no cost. Warranty services for the control panel must be conducted exclusively at a Phoenix Phase Converters authorized facility.

**LIFETIME
WARRANTY**

Electric Motor/Idler Warranty

The Electric Motor/Idler is covered by a three-year warranty provided by North American Electric Motors or Techttop. Additionally, the rotor has a lifetime warranty for the original owner, covering defects in materials and workmanship. Any necessary repairs or replacements for the North American Electric Motors or Techttop Idler must be carried out by a North American Electric Motors or Techttop Authorized Service Center and require prior written consent from Phoenix Phase Converters. Before any replacement is approved, the warranty inspection report and generator's specification tags must be presented.

**90 DAYS
RETURN POLICY**

RETURN POLICY

At Phoenix Phase Converters, we strive to ensure your complete satisfaction with our products. If for any reason you need to return a product, please review our return policy below:

Return Eligibility:

- Only sealed, unopened packages are eligible for return.
- Returns must be initiated within 90 days from the date of purchase.

Return Process:

1. Initiate a Return:

- Contact our customer service team to obtain a Return Authorization (RA) number. Returns without an RA number will not be accepted.

2. Prepare the Package:

- Ensure the product is in its original, unopened packaging. Include all accessories, manuals, and documentation that came with the product.
- Clearly mark the RA number on the outside of the return package.

3. Shipping:

- Ship the product to the address provided by our customer service team. You are responsible for the cost of shipping the product back to us.

Refund Details:

- Once we receive and inspect the returned product, a refund will be processed to your original method of payment.
- The refund amount will be the original purchase price minus the cost of shipping to and from your location. Shipping costs will be deducted based on what it cost us to ship the product to you.

Important Notes:

- Products that are opened, used, or not in their original packaging are not eligible for return.
- Refunds will be processed within 10-15 business days after we receive the returned product.

If you have any questions or need assistance with a return, please contact our customer service team at [1 \(888\) 379-3481](tel:18883793481).

Transformer Return Policy

Please note that transformers purchased from Phoenix Phase Converters are non-returnable under any circumstances except for defects. Defective transformers will be addressed according to our warranty policy. If you believe your transformer is defective, please contact our customer service team for assistance.
